

Cloudbased Solutions For Music Educators

As devices become more mobile, proprietary products that require disks, high specs and licensing are giving way to online solutions that are accessible on any platform, anytime..

Developers are working hard to make the jump from flash to HTML 5 as this happens more of the products will be available across all devices. (iPad's don't support flash)

MusicFirst have pulled together and developed a group of cloud based tools to help music educators with this.

Benefits of cloud tools include

- *No techs needed to install or support
- *Students can access by login, at school and at home or the library or at Grandmas.
- *Low yearly cost for subscription, no need to pay for upgrades.
- *Music examples, audios and video are all licensed.
- *In many cases the tasks can be delivered, completed and Assessed all within the program.
- *Applications are engaging and relevant to the digital native student.

MusicFirst Online Classroom

- * Calendar to map all tasks, assessments and lessons
- * Curriculum-based lessons and content
- * Digital assessment and portfolios for all students
- * Student and teacher access anywhere on any device
- * Create and grade tests and projects with ease
- * Integrated music software tools available

Integrated Software Tools include

Integrated Software Titles
